Migraine without aura

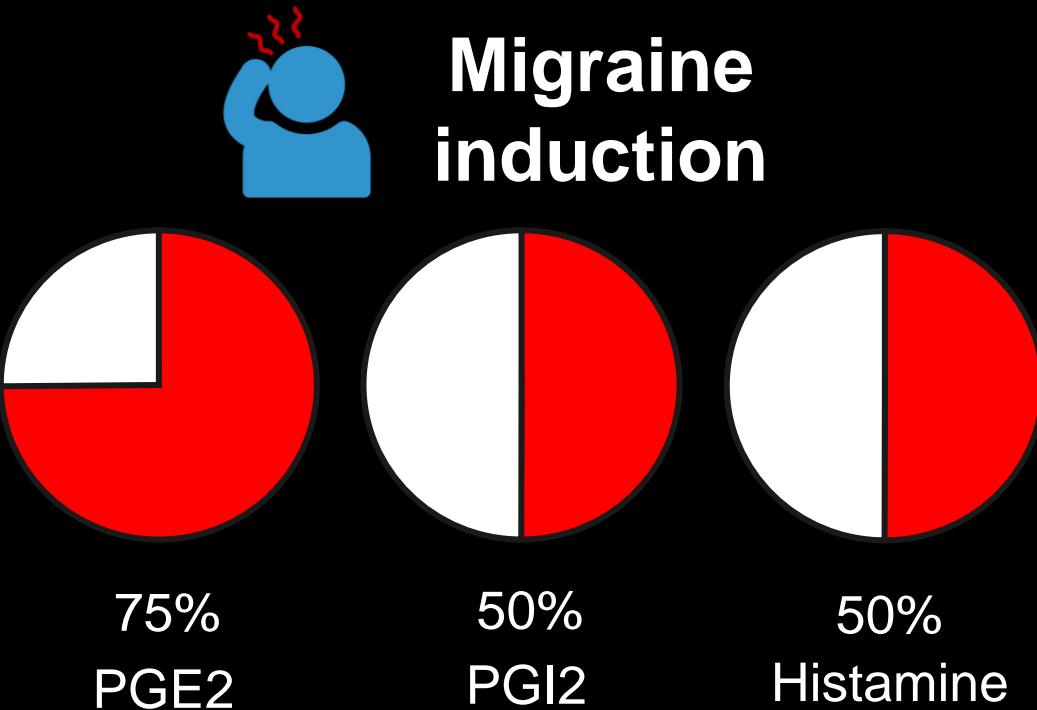

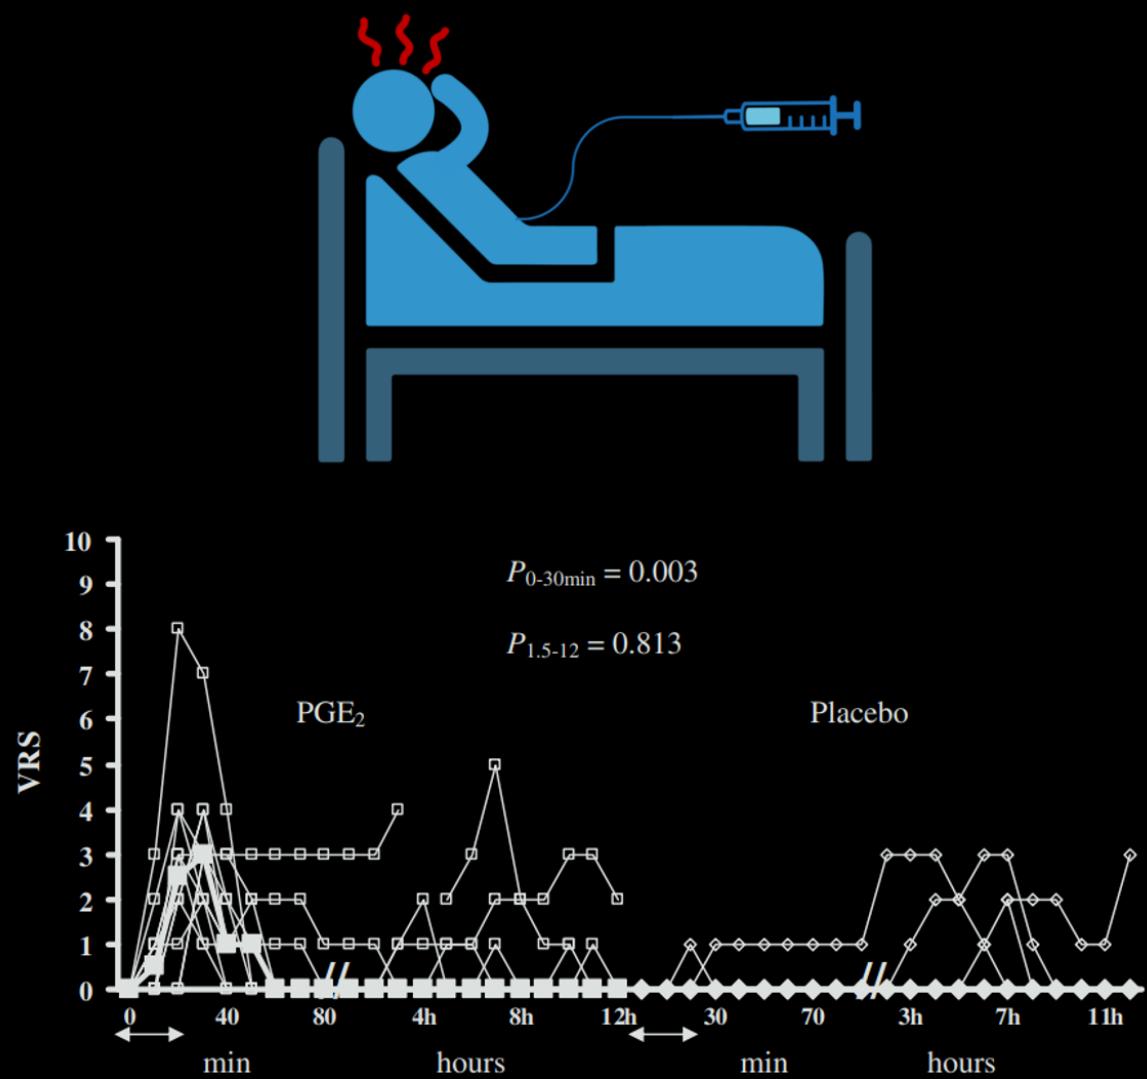

Migraine with aura

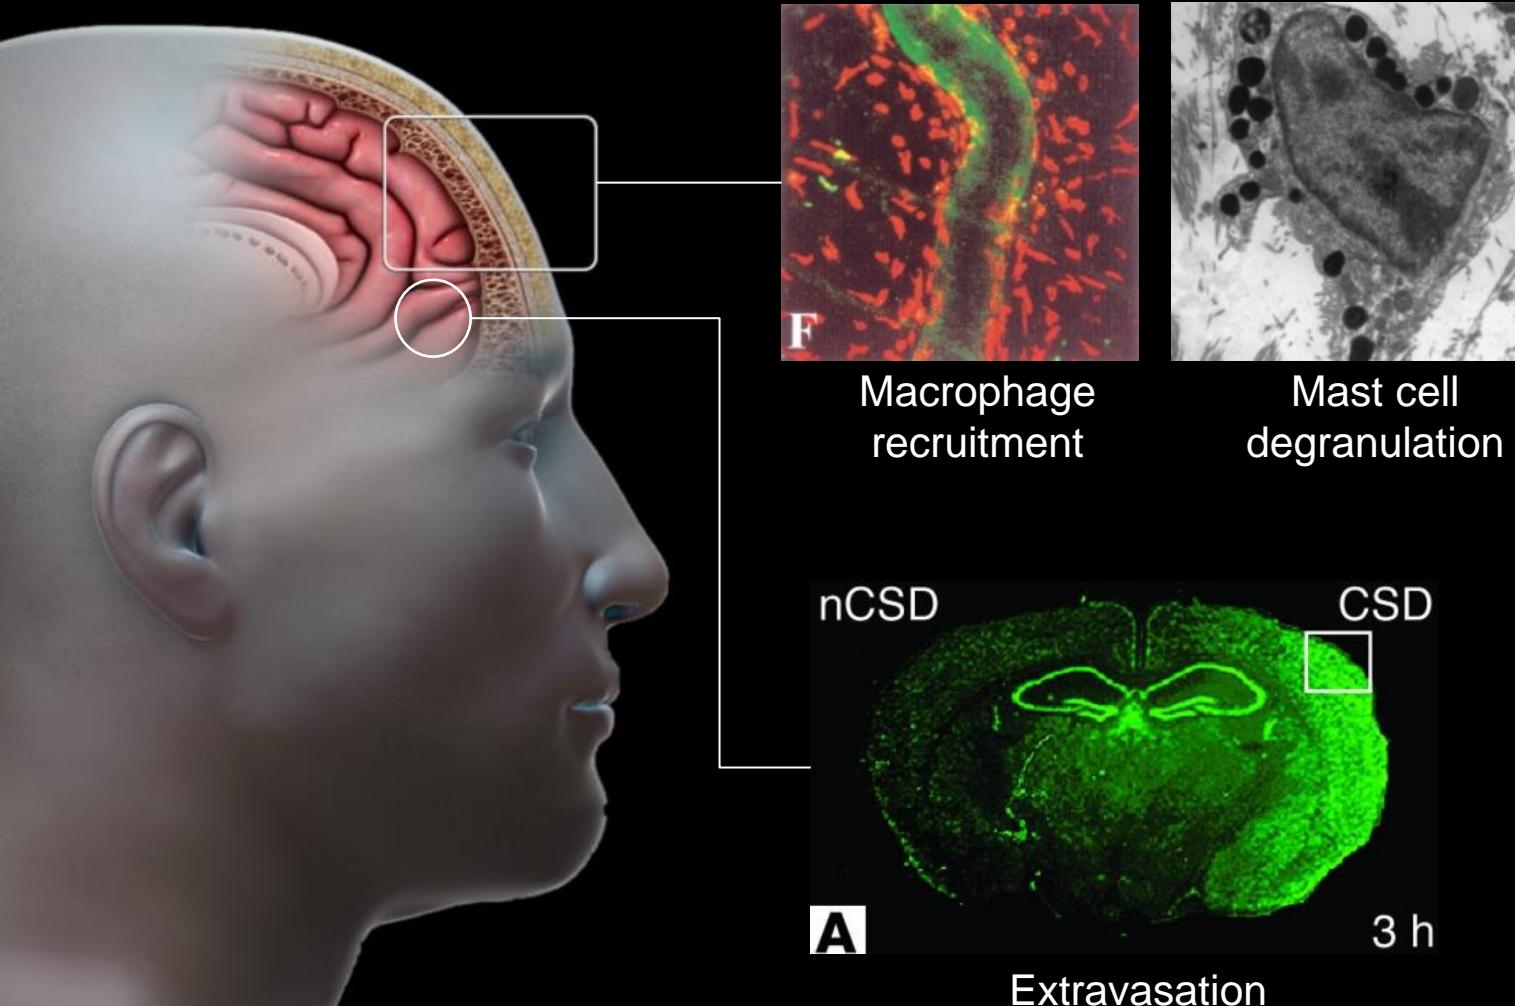

Neuroinflammation in Clinical Models of Migraine

Antonova et al., 2012, Cephalalgia
Wienecke et al., 2010, Cephalalgia
Lassen et al., 1995, Neuroreport
Zhang et al., 2007, J Pharmacol Exp Ther

Neuroinflammation in Preclinical Models of Migraine

Migraine triggers induce
neurogenic inflammation

Inflammatory mediators
activate meningeal
nociceptors

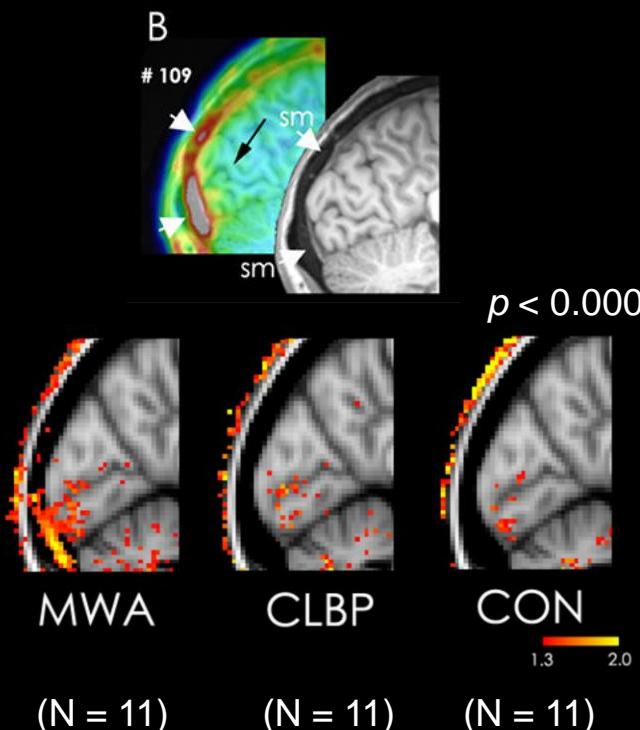

Reuter et al., 2001, Brain
Gursoy-Ozdemir et al., 2004, J Clin Invest
Zhang et al., 2007, J Pharmacol Exp Ther
Strassman et al., 1996, Nature

Imaging of Neuroinflammation

PET

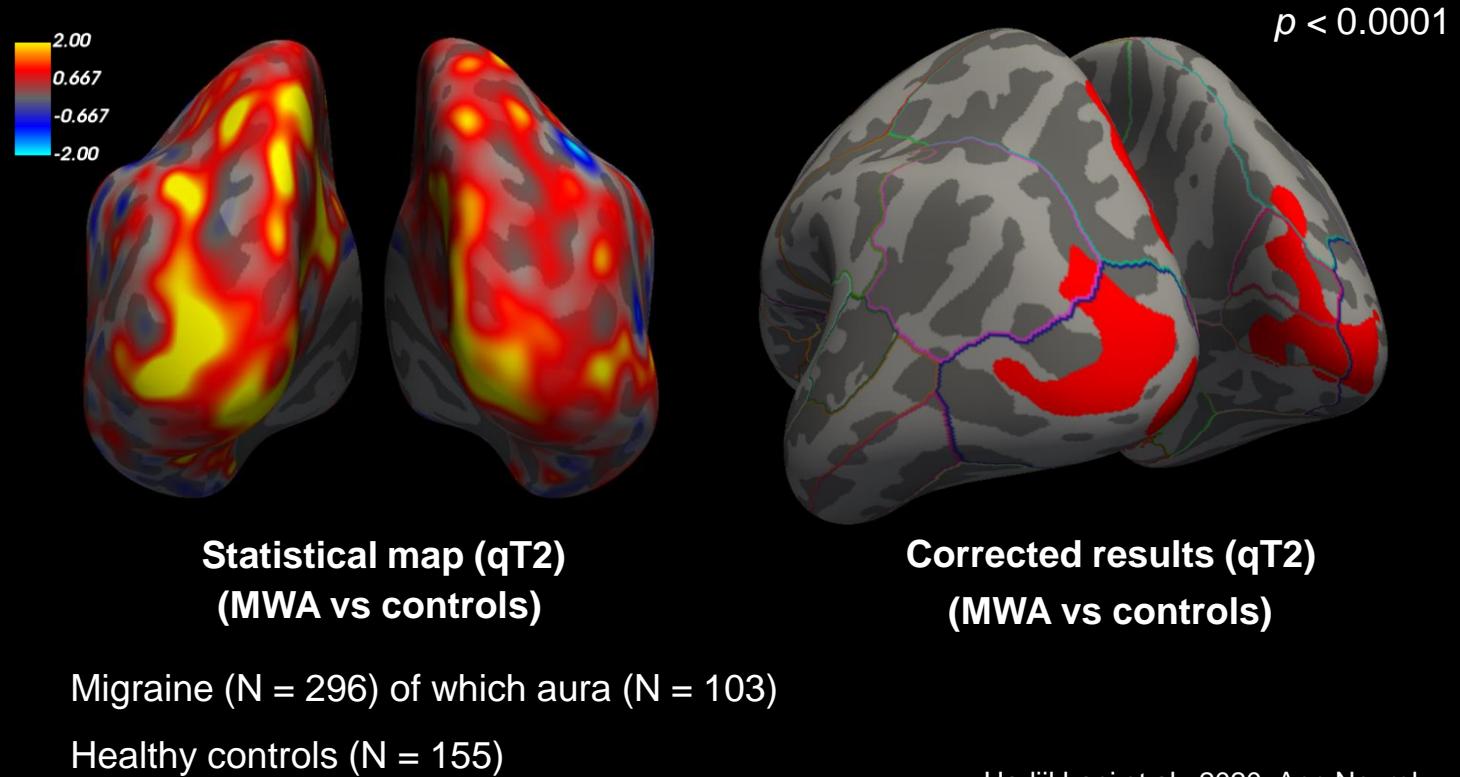

Uptake of the TSPO tracer (microglial marker)

Quantitative MRI

Higher inflammatory MRI measures (qT2) in visual cortex.

→ Consistent with **edema** and **cell accumulation**

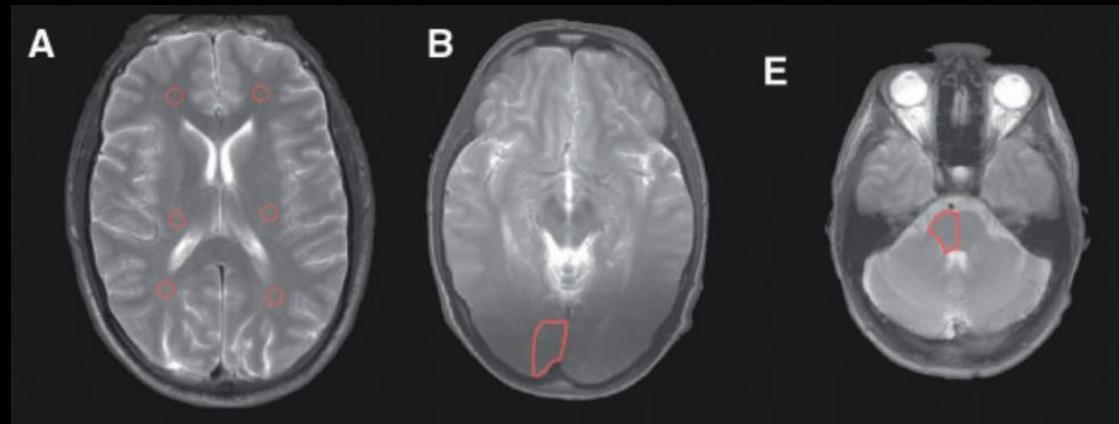

Suggesting Cortical and Parameningeal Neuroinflammation

Hadjikhani et al., 2020, Ann Neurol
Albrecht et al., 2019, Neurology
Christensen RH et al. Oral presentation: OPR-015; <https://doi.org/10.1111/ene.16337>; Eur J Neurol. 2024;31(Suppl. 1)

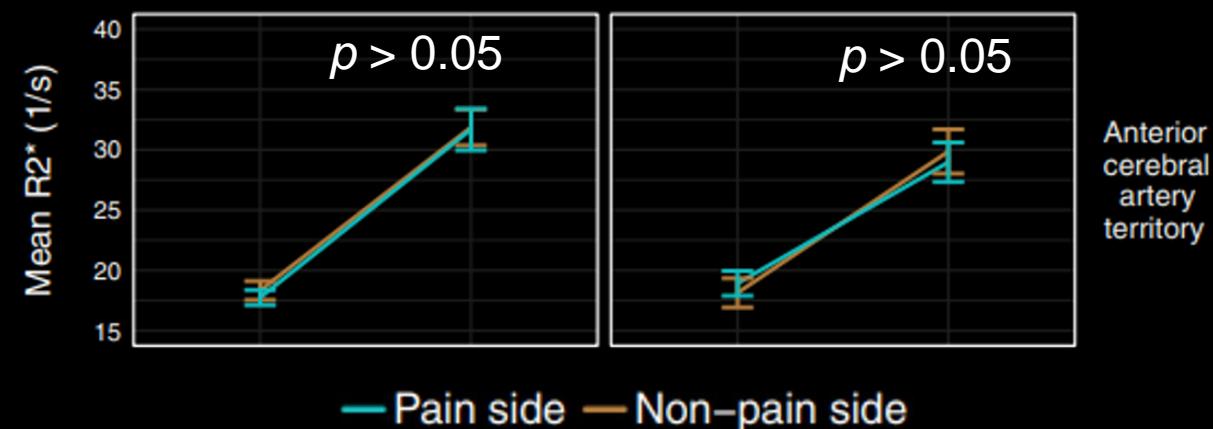

Imaging of Neuroinflammation

BBB permeability

Macrophage activity

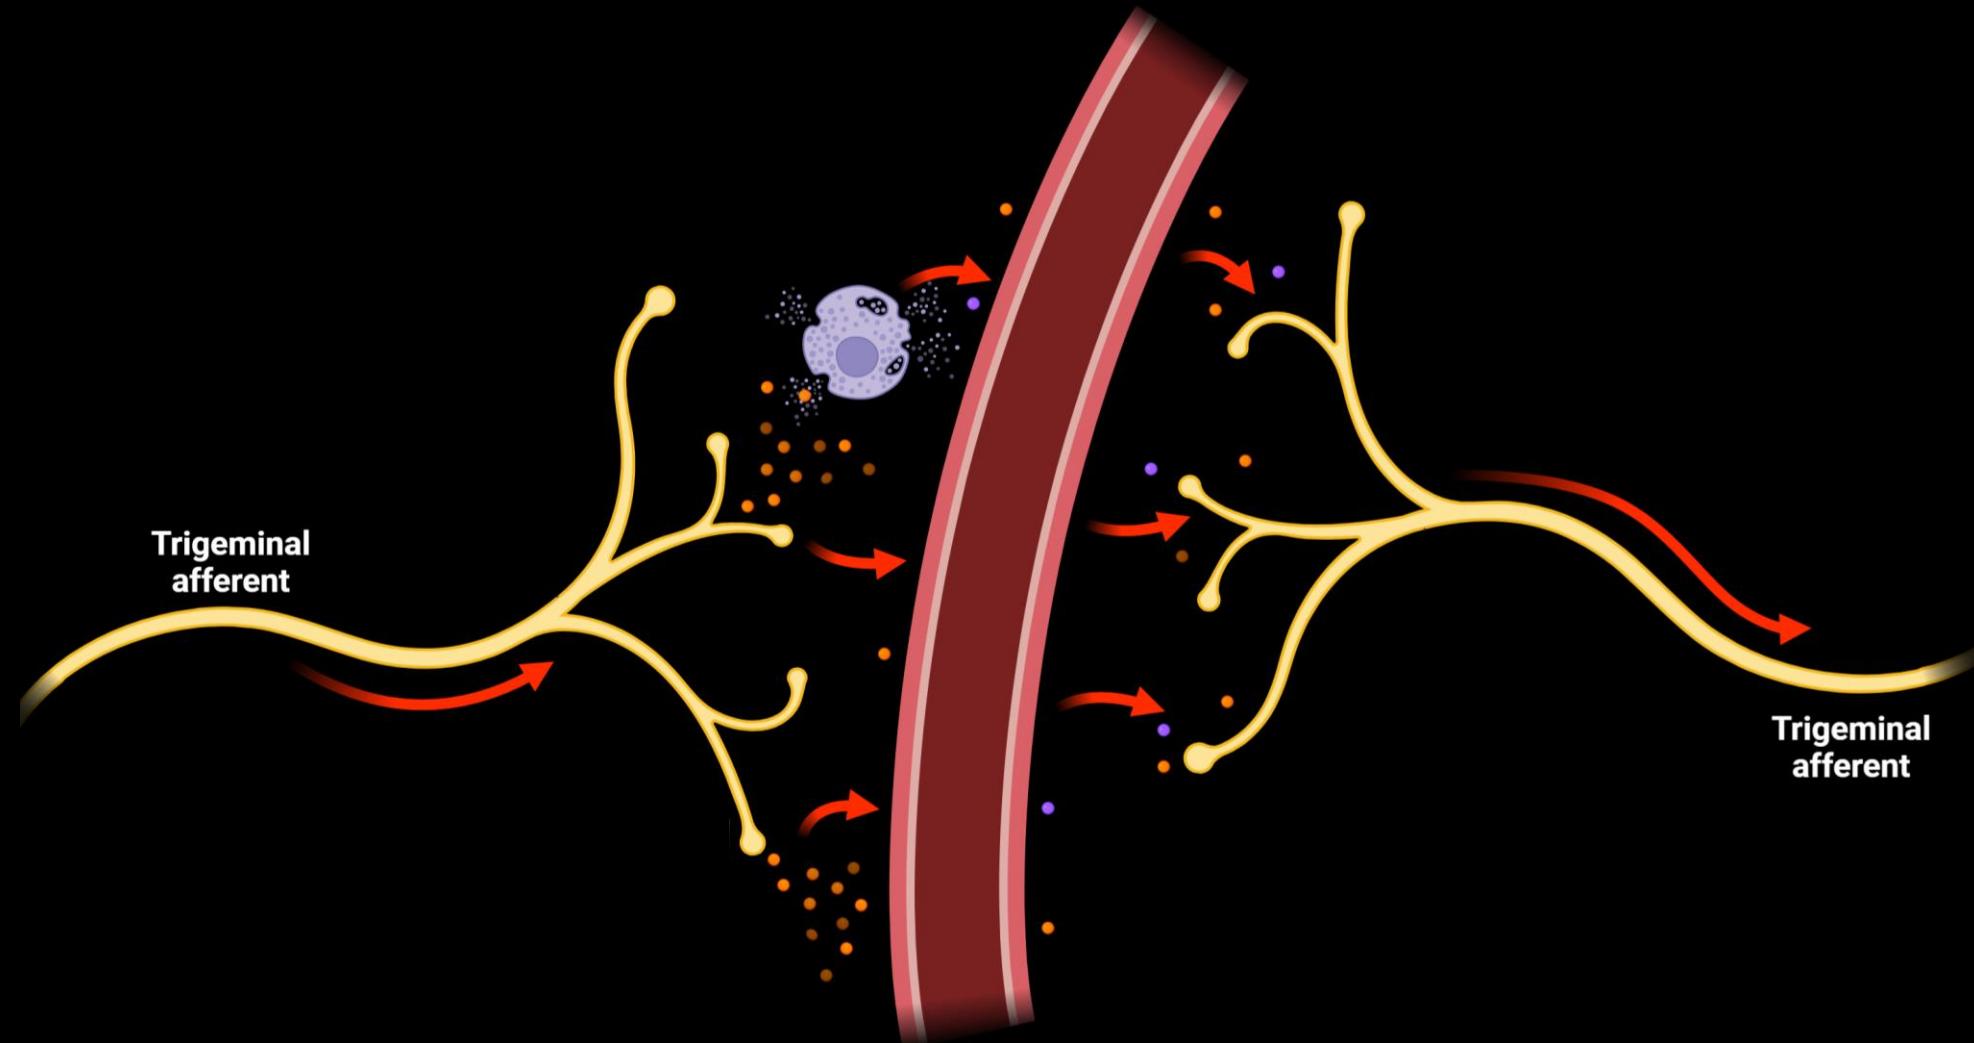

No difference in permeability during migraine attacks without aura ($p > 0.05$) or after aura ($p > 0.05$)

Meningeal inflammation?

Amin et al., 2017, Eur J Neurol
Hougaard et al., 2017, Brain
Khan et al., 2019, Cephalalgia

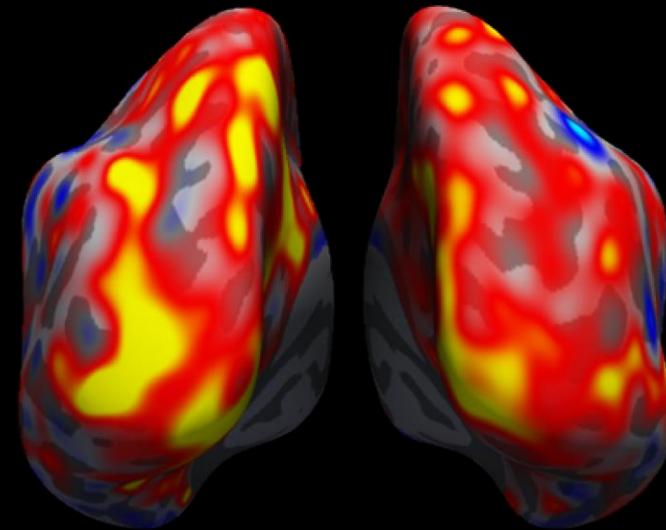

Is Neuroinflammation a Treatment Target?

However, relative contribution of anti-inflammatory effect unknown...

Main Messages

1. Neuroinflammatory substances elicit migraine
2. Neuroimaging suggests neuroinflammation in migraine with aura
3. Migraine treatments inhibit neurogenic inflammation

Thank you for listening
